Summary |

Game Developer with hands-on experience building a custom C++ Vulkan game engine and developing games in Unity (C#) and Unreal Engine (C++ and Blueprints). Proficient in real-time rendering pipelines, gameplay systems, and cross-platform development. Passionate about game engine architecture and delivering polished interactive experiences.

Technical Skills

Game Engines	Unity (C#), Unreal Engine (C++ and Blueprints)	Mobile (Android/iOS), UI Systems	
Graphics / APIs	Vulkan, OpenGL, DirectX 12, GLFW, ImGui	3D & Art	Blender, ZBrush, Substance Painter, Substance Designer
Languages	C++, C#, Python, TypeScript, CMake	Dev Tools	Git, GitHub, Visual Studio, VS Code, JetBrains
Gameplay	Game Loop, Physics & Collision, Enemy AI,		ToolBox(Clion and Rider), Jira

Projects

Endless Runner <i>Unreal Engine, C++, Desktop, Android</i> 3D endless runner game built in Unreal Engine with desktop and mobile touch controls.	Playtest Link
Action Combat Demo <i>Unreal Engine, C++, Desktop</i> 3D action combat demo built in Unreal Engine.	Playtest Link
Third Person Shooter Demo <i>Unreal Engine, C++, Desktop</i> 3D third person shooter demo built in Unreal Engine.	Playtest Link
Mango Engine <i>C++, Vulkan, GLFW, ImGui, stb_image, tinyobjloader</i> - Custom 3D game engine built from scratch in C++/Vulkan with a full rendering pipeline: swap chain, render pass, framebuffers, command buffers, and vertex/index buffers. - Integrated ImGui debug UI, Spdlog logging, and an asset pipeline for textures and 3D meshes.	Github Repository

Experience

Athena Education <i>Expert Mentor / Senior Associate - Design</i> - Designed and conducted a Game Design & Development Academy covering game mechanics, and level design for 8+ middle school students. - Mentored students through game design, UI/UX, web and app development, CAD, and animation portfolio projects for Ivy League applications and international competitions (Breakthrough Challenge).	March 2024 – May 2025
Monkey Science <i>Creative Engineer (Intern → Full-time)</i> Built real-time interactive 3D science simulations using TypeScript and BabylonJS (WebGL), deployed in a production React environment across multiple schools.	May 2023 – Oct 2023

Education

Indian Institute of Information Technology, Una <i>Bachelors of Technology, Computer Science and Engineering</i>	2019 – 2026
--	--------------------

Certifications

Unreal Engine 5 C++ Game Development <i>Udemy</i>	2026 <i>Certificate</i>
---	-----------------------------------
